- Now I am in Croatia.

I am a developer with a strong desire for continuous learning and growth. I am looking for opportunities to apply and enhance my skills in real projects.

I have experience working in DevOps, which includes setting up and managing infrastructure, automating processes, and ensuring continuous integration and delivery (CI/CD). I am responsible for optimizing workflows, monitoring systems, and maintaining service reliability.

Additionally, I have developed applications in Java for friends, working on various projects that helped me improve my programming skills and gain practical experience.

Skills

- Programming Languages: Java, C/C++, Python
- Frameworks and Tools: Spring Boot, Maven
- Databases: MySQL, InfluxBD
- Experienced with: Proxmox, Docker, Grafana, Telegraf
- Algorithms and Data Structures
- Understanding of cryptocurrencies and blockchain technologies

---

Projects

1. Banking system (Java)
2. Minecraft game mod (Java)
3. Chess/Checkers (Java)
4. Android app for displaying selected photos with interval settings (Java)
5. Air traffic control system (C++)
6. Telegram bot (Python)
7. Set up a Proxmox server with a dedicated VM network, NAT, and SSH access. Installed InfluxDB, Grafana, and configured Telegraf on an Ubuntu VM to monitor metrics. Created a Grafana dashboard with Telegram alerts for high CPU usage.

Education

- I started studying for a Bachelor's degree in Computer Engineering at the National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute." *2024*

Personal Qualities

- Commitment to continuous learning and growth
- Teamwork skills
- High motivation and initiative
- Quick learner

Language

- Ukrainian - native
- English - B
